SUBJECT: SECURITY INVESTIGATIONS OF INDIVIDUALS -
SECURITY INDEX STANDARDS

Re SAC Letter #73 dated July 24, 1951.

The instructions contained in Section A of referenced SAC Letter have been completed as to the review of the files in the Norfolk office.

The area covered by the Norfolk office now has about 30 Communist Party members. This number has decreased slightly since January 1, 1949. This office has attempted to investigate any alleged members of the CP in order that our responsibility as to Security Index subjects may be met.

As a result of a complete review as set forth in referenced SAC Letter, two new security cases have been assigned for active investigation to determine whether they should be included in the Security Index.

RE: SUMMARY OF SUMMARY REPORTS

Revised date: November 15, 1951.

Summary reports prepared under the instructions in LHM Letter 95 dated April 28, 1951, should receive the same dissemination on a local level as regular investigation reports. Summary reports should be prepared in a concise manner for dissemination to all instances of intelligence interest in the subject matter of the investigation.

Office Memorandum • UNITED STATES GOVERNMENT

TO : THE DIRECTOR
FROM : THE EXECUTIVES' CONFERENCE
SUBJECT: SECURITY INDEX *MINI*

DATE: October 19, 1951

On October 19, 1951, the Executives' Conference consisting of Messrs.:

considered the question of whether closed Security Index cases should be reopened at such time as summary type reports and the subsequent yearly reports are rendered by the Field, or whether they should remain in a closed status and be followed by administrative tickler.

Inspector(, during the inspection of the Minneapolis Division, advised that there is some confusion in the field as to whether cases on Security Index subjects employed in vital facilities should be reopened each six months at the time that the employment in the vital facility is verified and the appropriate Armed Forces agency is advised of the correct status of the subject by investigative report. (L recommended that the cases be reopened each six months for the purpose of verification and thereafter closed when the investigative report is written.

We have recently instructed the field to submit summary type reports on all Security Index subjects, regardless of whether they are employed in a vital facility, and to submit yearly reports thereafter. Therefore, the problem pointed out by Inspector exists in connection with all Security Index subjects and not just those employed in vital facilities. Heretofore, we have instructed the field that when they verify the current address and employment of Security Index subjects each six months, the case should be followed by administrative tickler and not be reopened or carried in a pending inactive status unless it falls in a specialized group, such as Key Figures. However, by SAC Letter Number 95 dated September 22, 1951, the field was instructed to follow cases for the yearly summary reports by administrative ticklers. They were instructed that these cases should be reopened when the summary reports become due, re-evaluated in light of existing instructions and brought up-to-date to determine the subject's current activities.

/

Executives' Conference
Recommendation:

The Executives' Conference was of the unanimous opinion that as it is necessary to conduct research, and in many instances investigation, prior to preparing the required reports, and further to insure the proper administrative handling and following of these cases, it is desirable to reopen these cases at the appropriate time and assign them to Agent personnel for handling. After the required reports are submitted, the cases should again be closed and subsequently followed by administrative tickler.

We will continue to follow our past procedure of maintaining specialized cases such as Key Figures, Top Functionaries, etc., in a pending-inactive status, as there is need for continued investigative attention in those cases.

In order that we can be sure that the field is following Bureau instructions requiring the submission of summary type and investigative reports in Security Index cases, the Conference recommended that during both official inspections by Bureau inspectors and self-inspections in the field, the inspector be required to check the files on all Security Index subjects for the purpose of ascertaining whether reports are being submitted at the required intervals.

In the event you agree, the attached SAC Letter advises the field that this procedure is to be followed and the Training and Inspection Division will issue appropriate instructions to Inspectors.

Respectfully,
For the Conference

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: 11/21/51

FROM : SAC, St. Louis

SUBJECT: SECURITY INVESTIGATIONS OF INDIVIDUALS -
SECURITY INDEX STANDARDS

Re SAC Letter No. 73, series 1951, dated 7-24-51.

Please be advised that as a result of the review of the files requested in referenced SAC Letter, the St. Louis Office opened 34 security cases pursuant to the instructions contained in the referenced SAC Letter.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI
Att:
FROM : SAC, New York

DATE: October 11, 1951

SUBJECT: SECURITY INVESTIGATIONS OF INDIVIDUALS-
SECURITY INDEX STANDARDS

Reference is made to SAC letter #73, Series 1951, dated 7/24/51, Sub-section A, which advised that standards for the inclusion of individuals in the Security Index are now broadened to include persons "holding, at any time after 1/1/49, membership in any organization or political party which seeks to overthrow by force or violence the Government of the United States." Relet suggested the following reviews as a means of locating those persons so reported:

1. Review of all individual security cases which have been opened since 1/1/49.
2. Review all references from 1/1/49 to date.
3. Review the Communist Index for the names of persons reported as active in such organizations subsequent to 1/1/49.

These suggestions, as they relate to this office, have been given very careful and thorough consideration, and I respectfully desire to make the following observations:

Concerning Bureau suggestion designated as #1 above, it is pointed out that there is no available record which would enable this office to determine which case files have been opened or reopened since 1/1/49 nor would such a record, if available, reflect all persons reported as active in the Communist Party or related groups subsequent to 1/1/49. Until July of 1950 there was no necessity of opening active files merely on the allegation of membership alone and, therefore, a review of files opened for investigation since 1949 would not serve to locate all those persons reported as active since 1949.

Concerning Bureau suggestion designated as #2 above, namely that the should be reviewed from 1/1/49 to date, it is pointed out that such a review can be expected to be of little value since it has been the practice of the New York Office even prior to January, 1949, to open at least a dead-end on any person reported to be a member of any of the organizations with which referenced SAC letter is concerned.

With regard to suggestion #3, it is not until April, 1948 the New York Office reviewed an approximate total of 119,000 closed and pending files in the and classifications. At the time of the review a Communist Index card was prepared on each person residing in the New York Division, who had been reported at any time prior to the date of the review, as a member or

Letter to Director, FBI

changed to
34-48
10-11-51

sympathizer of a subversive organization. As a result of the review, 28,000 Communist Index cards were prepared. Since this review the New York Office has continued to prepare C. I. cards on all persons reported to be members or sympathizers of a subversive organization. As a result of this policy there are now approximately 56,500 C. I. cards on file in this office, which figure represents a total of all persons who have resided in the New York area and who have been reported at one time or another to be active in a subversive organization. However, since there is no requirement that C. I. cards be maintained in a current status, it will not be possible to secure the desired information from a review of the cards themselves. To ascertain those individuals reported as active in one of the organizations since 1/1/49, it will be necessary to review each of the 56,500 files represented by a C. I. card. For reasons which will be set forth below, it is not believed that the results to be achieved by such a project will compensate for the extensive research that will be required in carrying out the project.

By SAC letter #48, Series 1950, dated 7/22/50, the Bureau advised that consideration should be given for inclusion in the Security Index those persons who were as of July, 1950 "active, participating members of the Communist Party or related groups, or those who actively espouse the line of these groups."

Since July of 1950, the above instructions have been strictly adhered to by this office. Whenever information has been received indicating that an individual is a member of, or active in, one of the organizations listed above, a case file has been opened for investigation. In addition, however, this office has adopted a somewhat liberal interpretation of the above instructions. The date of July, 1950 has not been utilized as an absolute line of demarcation when consideration is given to opening a file for investigation. A lack of information indicating current Communist Party activity on the part of a subject has been considered to be due more to the security measures adopted by the Party rather than to the lack of activity on the part of the subject.

As a result of the above interpretation, this office has been opening investigations on individuals active in one of the organizations under discussion, even though the activity may have occurred during the year 1949. These cases have been opened in a routine manner as information indicating Party activity was received from Sutech, trash covers, informants and other sources. In this manner approximately 7000 Security Matter - C cases have been opened during the past fourteen months.

changed to
34-48
10-11-51

Letter to Director, FBI
NY

Because of this system in which files are continually coming to the attention of the Security Matter supervisor, it is felt that cases already have been opened on the vast majority of persons who have been reported to this office to be active in the Party subsequent to 1/1/49. Therefore, UACB this office will continue to follow this procedure and will not attempt a review of the more than 56,000 case files represented by Communist Index cards.

The New York Office is cognizant of its responsibility with regard to individuals whose activities or sympathies are such as to warrant their inclusion in the Security Index and will continue to be alert for them and to open cases promptly.

SAC, New York

November 7, 1951

Director, FBI

100-137 SECURITY INVESTIGATIONS -
SECURITY INDEX STANDARDS

Reurlet October 11, 1951, wherein you advise that you will not attempt to review the 53,000 case files represented by Communist Index cards for the purpose of investigating the subjects thereof who come within the meaning of the instructions issued in SAC Letter No. 73(A), dated July 24, 1951.

You point out that you feel that cases have already been opened on the vast majority of persons who have been reported to your office to have been active in the Party subsequent to January 1, 1949.

The extent and nature of any review prompted by the Bureau's instructions must necessarily be a matter for your own decision. I desire to point out, however, that you are responsible for the investigation and consideration for inclusion in the Security Index of all individuals coming within the category defined in SAC Letter No. 73. This does not merely mean the majority of such individuals. Unless you are certain that all such individuals have been investigated and that all such individuals have been considered for inclusion in your Security Index in line with the standards which were broadened by SAC Letter No. 73, it is mandatory that you conduct any review necessary to comply with these instructions.

If the reviews suggested by the Bureau in SAC Letter No. 73 are necessary to accomplish this, such reviews should be made. The Bureau made these suggestions in order to accomplish the objective prompted by the instructions. If you believe that the suggested reviews will not accomplish this objective, you are to advise what you intend to do to comply with the instructions.

You are to reply to this memorandum within fifteen days.

Let to Dir.
NY

large remainder of cases which are touched upon later in the schedule outlined in that SAC let, they are not quickly distinguishable in the Security Index from the other Security Index Cards. Therefore, we have recently been considering a suggestion that the Security Index Cards on Vital Facility subjects be filed under a separate breakdown in the Index. It is felt that this would be helpful in several ways:

First, it would provide quick access to the cards if any special action were required to be taken regarding those subjects;

Second, it would reduce the possibility of overlooking the proper handling of some of these cases, which possibility it is felt exists to a higher degree while the cards are filed with the ordinary Security Index subjects; and

Third, it would present a more ready picture of the general composition of our index.

The Bureau's comments regarding this suggestion are solicited.

RE: REVIEW OF SECURITY
INDEX CASES BY
DEPARTMENT ATTORNEYS
- GENERAL

Memorandum to dated May 24,
1951, requested:

- a. Review of all Security Index cases be completed as soon as possible and advice as to whether the Department approved or disapproved in each individual case the listing of the subject in our Security Index.
- b. Advice as to the decision reached in each case reviewed to date and in the future advice as to the decision reached as each review is completed.
- c. Specifically that the Bureau be advised at an early date whether the 34 named prominent individuals should be retained in our Security Index.

No advice has been received from the Department to date regarding the review of any Security Index case.

October 2, 1951

RE: NAMES OF DEPARTMENT
ATTORNEYS WHO WILL CONDUCT
DETAILED REVIEWS OF SECURITY
INDEX CASES

has furnished the names of five Department Attorneys who constitute a board within the Department set up to review cases on individuals included in our Security Index, namely,

However, has never furnished the names of the Attorneys who will actually be conducting the detailed reviews of Security Index cases, although he has on various occasions, and particularly on May 31 and June 8, 1951, told that as soon as the complete list of Attorneys who will make the detailed reviews is available he will furnish such list to us in order that we can check their names against our indices.

October 2, 1951

RE: SECURITY INDEX STANDARDS

GENERAL

Memorandum to dated June 28, 1951, furnished the Bureau's views in connection with the Department's revised Security Index standards which revised standards differed considerably from the standards used by the Bureau. The differences were specifically set out in the memorandum, and it was pointed out to the Department that there must be a clear understanding and approval by the Department of the Security Index standards being used by the Bureau. That memorandum was acknowledged by

memorandum of July 16, 1951, which stated that the Department agreed with the Bureau's concept of the Security Index Program, and that the suggestions regarding the revised standards were being studied. We have received no further advice concerning Security Index standards although we acknowledged the latter communication by our memorandum of July 20, 1951, in which we stated we would appreciate receiving comments and suggestions on the Security Index standards.

SUBJECT: SECURITY INVESTIGATIONS--
SECURITY INDEX STANDARDS

Reference is made to Bureau letter 11/7/51. The Bureau's suggestions and directions are appreciated. The responsibility of this office for the investigation and consideration for inclusion in the Security Index of all individuals coming within the category defined in SAC Letter #73 is fully appreciated and will be carried out. The fact that any review of files that is felt necessary in order to carry out these instructions of the Bureau would necessarily be mandatory is also appreciated.

This office will not limit its review of files and information available to the suggestions made in SAC Letter #73. Gradually, informants are being contacted and, as all files are reviewed on tickler or for any other reason and as information is developed to indicate the identity of Communists, appropriate files are being opened and investigations ordered. This process is, naturally, a continuing one and this office will remain ever alert to it.

Office Memorandum • UNITED STATES GOVERNMENT

TO : DIRECTOR, FBI

DATE: November 20, 1951

FROM : SAC, SAN JUAN (

SUBJECT: SECURITY INDEX -
PREPARATION OF SUMMARY REPORTS

Reference is made to SAC Letter No. 95, Series 1951,
dated September 22, 1951.

Initially it was the opinion of this office, on reading the above mentioned SAC Letter, that the Summary Reports prepared on all SI subjects would be identical in form and content to the Summary Reports required for the Smith Act prosecutions with the exception that the Summary would only contain information currently in file as of the date of the Summary, and that any deficiencies pointed out in connection with this Summary could be remedied by later investigation and brought up to date in the next Summary Report to be prepared on the particular individual. Prior to the preparation of Summaries in this office, copies of a Summary Report prepared by the New York Office in the case entitled, _____, was., SECURITY MATTER - N (New York File _____) was received in this office. Although the New York report contains all of the captions as set forth in the above referenced SAC Letter, the form of the report is more that of an Investigative Summary rather than a Prosecutive Summary.

Clarification of this apparent difference is requested in order that San Juan may prepare its summaries on SI subjects in the exact form desired by the Bureau.

WASHINGTON 25, D. C.

Security Case - Bureau
(A) INTERVIEWS IN SECURITY CASES -- I desire to emphasize again the importance of thoroughness in the interviewing of persons involved in security matters. It has been our experience that all data in an individual's possession cannot be developed in one or two interviews. It should be recognized that where a person has been active over a period of years in the espionage or communist field, he or she has possession of a great deal of information which is often of utmost value to the Bureau.

Prior to an interview of a person who may be expected to have considerable information of value to us, there should be a thorough preparation for the interview. This preparation should encompass not only a knowledge of the known background and activities of the person being interviewed, but should also include knowledge on the part of the interviewing Agents of matters concerning which the person being interviewed might logically have information. It is, of course, recognized that situations may present themselves where such preparation is not possible, but wherever it is feasible such preparation should be made.

Once the interview is undertaken and it is found that the person being interviewed can furnish us information of value, we should attempt to develop and exploit the person's knowledge to the utmost. The person being interviewed should be informed of the fact that we are interested in interviewing him or her in great detail. Arrangement should be made to conduct the interviews over as extended a period as is necessary fully to develop the matter. During the course of the interviews, if it is necessary to have investigation and research conducted to verify or add to what is being developed, this should be done. Information may be needed from other offices or from the Bureau to assist in the interviews, and if so, a request for such information should be made immediately. It should be constantly borne in mind that we desire to profit by the interview in as greatly a manner as possible. Undoubtedly, if the person has knowledge of espionage or communist activities, we will want to recontact him or her in the future on a variety of matters, and the establishment of confidence in the Bureau should be developed for our future benefit.

A thorough and accurate reporting of information developed is, of course, absolutely essential. This reporting requires careful preparation, with an understanding that a permanent record is being

established of what the individual being interviewed furnished. There should be a careful organization of material being reported. Care should be exercised to see that the data developed are reported in the appropriate investigations, and that offices with an interest in the results of the interview are furnished the applicable information.

In many instances it will be a desirable practice to report all information developed in the main file on the individual being interviewed and at the same time report pertinent information developed in the main files on other individuals, and where there is no main file the information should be reported under the caption of the individual to whom the information pertains.

The above instructions are for your guidance in conducting interviews in security cases, and it is felt that careful attention to this phase of the Bureau's work can benefit our responsibilities in the security field.

Very truly yours,

John Edgar Hoover

Director

SECURITY INDEX -
PREPARATION OF SUMMARY REPORTS

-11

Reurtel November 21 last requesting the Bureau's advice concerning preparation of summary reports.

A synopsis shall be prepared for each report submitted in response to the instructions contained in SAC Letter Number 95 dated September 22, 1951. These reports shall be prepared in accordance with the instructions set forth in SAC Letter Number 95 and will not be marked as prosecutive or nonprosecutive summary reports. The pink first page to be utilized in the reports containing the words "Summary Report" will suffice for identifying the report.

You inquired as to whether the subjects' activities should be set forth in chronological or in logical sequence with informants being identified after each activity or whether the subjects' activities must be reported chronologically under each informant.

In answer to this inquiry your attention is directed to SAC Letter Number 95 which states on page six that all of the information received from each person, confidential informant or confidential source should be set out in chronological order under the name or symbol number of the respective person, informant or source. In addition, if one informant has furnished information which should logically be broken down under two or more of the subjects, each report unit should be done with the same temporary symbol number being utilized for that informant throughout the report.

A forthcoming "Summary Report" contain further observations and instructions relative to the preparation of summary reports.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FROM : SAC, San Francisco (

SUBJECT: SUMMARY REPORTS

DATE: 11/30/51

Re SAC Letter 95, Series 1951, which instructs summary reports are to be written in security investigations. index

In view of existing instructions concerning summary reports of subjects of LRA 1947 investigations it is felt that a separate summary report as indicated in SAC Letter 95 would amount to an unwarranted duplication of effort. UACB security subjects who are also subjects of LRA summary reports will not be subjects of summary reports as called for in SAC Letter 95, Series 1951.

Director, FBI

SECURITY INDEX -
PREPARATION OF SUMMARY REPORTS

Reurlet dated November 30, 1951, wherein you stated that you feel that a separate summary report as requested in SAC Letter Number 95 on individuals on whom summary reports have been prepared in LMRA investigations would amount to an unwarranted duplication of effort. You stated that UACB Security Index subjects in your office who are also subjects of LMRA summary reports will not be subjects of summary reports as requested in SAC Letter Number 95.

The Bureau desires that summary reports be prepared in the security investigation of any individual in the Security Index regardless of the fact that the subject has been the subject of an LMRA investigation.

It should be noted that while detailed information is required in the summary reports dating from the date that a subject signed his non-Communist affidavit, such detailed information is not required concerning his activities prior to the date of his signing the affidavit. The summary reports requested for Security Index subjects by SAC Letter Number 95 should reflect complete information not only subsequent to the date a subject may have signed a non-Communist affidavit but also prior thereto. It should also be noted that in the event subjects in the Security Index are apprehended under the Emergency Detention Program, the summary reports prepared under instructions in SAC Letter Number 95 will be utilized by United States Attorneys for presentment of the cases to hearing boards. It is not desired that should it become necessary to apprehend the subjects that the LMRA reports be utilized for this purpose.

You are, therefore, to prepare summary reports in security investigations of each subject in the Security Index even though a summary report has been submitted in the LMRA investigation.

Security Interview - Bureau

(E) INTERVIEWS OF SUBJECTS OF SECURITY INVESTIGATIONS -- Current Bureau instructions require that interviews of subjects of security investigations be conducted by two Agents experienced in security investigations.

Henceforth, when interviews of subjects of security investigations are to be conducted, a new Agent may accompany an Agent experienced in security investigations for the purpose of gaining experience and training. It will be necessary, however, that the experienced Agent actually conduct the interview.

Such interviews must be carefully planned by the Agents who are to conduct them and care should be taken by all interviewing personnel to be certain that the interviews are conducted in a manner which will attain the best possible results.

Very truly yours,

John Edgar Hoover

Director

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI()

DATE: November 30, 1951

FROM : SAC, Memphis

SUBJECT: SECURITY INDEX
PREPARATION OF SUMMARY REPORTS

Reurlet November 19, 1951, and remylet October 26, 1951.

The original figure of fifteen security index cards for the Memphis Division set out in October 26, 1951 letter was erroneous. At that time this office had twenty-three security index subjects.

Since that time two security index subjects have moved to other divisions and their cases have been RUC'd. Six additional subjects have also moved and their cases will be RUC'd as soon as current residences have been verified in the respective divisions.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: 10-30-51

FROM : SAC, St. Louis

SUBJECT: SECURITY MATTER INVESTIGATIONS

Reference is made to No Number SAC Letter dated 6-11-51 which instructs that interviews shall be conducted after Bureau authorization on subjects in certain Security Matter investigations. Instructions contained in this SAC Letter are to the effect that at the time a closing report is submitted the field office shall make a recommendation as to the interview with the subject.

It is to be noted that there are occasions when in accordance with the provisions of the Handbook, Section 44(A) (2), a security matter case would be closed without the submission of an investigative report. There are occasions when these security matter investigations could be closed by the field in accordance with the Handbook provision without the submission of a closing investigative report to the Bureau.

The Bureau's advice is solicited as to whether the field can continue to close security investigations by memorandum in accordance with the above Handbook provision without communicating with the Bureau regarding interview of the subject in accordance with the above SAC letter. It would seem that in those instances where the case is closed merely by memorandum the facts developed would be so insignificant as not to warrant interview with the subject. Kindly advise.

SUBJECT: SUMMARY REPORTS IN
SECURITY INDEX CASES

Re SAC Letter 95, Sept. 22, 1951, and Bulet Nov. 29, 1951,
to Memphis.

Please be advised that a priority schedule has been set up in the Minneapolis Office in accordance with the instructions set forth in referenced SAC Letter for the preparation of summary reports in Security Index cases. At the present time, categories II and III do not have any reports presently due. Category IV relating to key figures is presently being worked upon, as is category V relating to subjects employed in vital facilities.

A breakdown of the reports to be written in categories II through VII is as follows:

II.	Special Section.	None
III.	Top Functionaries.	None
IV.	Key Figures.	12
V.	Subjects Employed in Vital Facilities	11
VI.	Cases Wherein No Reports Have Been Submitted Since January 1, 1949	35
VII.	All Other Security Index Cases With The Summary Reports	348

Office Memorandum • UNITED STATES GOVERNMENT

DATE: December 5, 1951

TO :

FROM :

SUBJECT: INTERVIEWS OF SUBJECTS
OF SECURITY INVESTIGATIONSPURPOSE

To obtain approval for the attached SAC Letter.

BACKGROUND

As you know, current Bureau instructions to the Field concerning interviews of subjects of security investigations require that these interviews be conducted by two experienced Agents.

Attached herewith is a letter from the Buffalo office advising that due to a shortage of personnel experienced in security investigations they are desirous of using "first office" Agents in the company of an experienced Agent in conducting these interviews.

The requirement that two experienced Agents be assigned to interview security subjects was made when the interview program was first instituted. So far our interview program has been highly successful with over 1446 interviews conducted and no serious repercussions have arisen from these interviews to date.

I believe that in the interest of expeditiously handling these cases it would be desirable to instruct the entire field that it is permissible to have "first office" Agents participate in the interviews of security subjects so long as the actual interviews are conducted by Agents experienced in security investigations. Such a procedure will not only facilitate the handling of these interviews when the cases are assigned to "first office" Agents for investigation but will also broaden the training of such Agents in the matter of security investigations.

ACTION

If you agree, there is attached herewith an SAC Letter so instructing the Field.

TO : Director, FBI
FROM : SAC, Butte

DATE: December 6, 1951

SUBJECT: SECURITY INDEX
PREPARATION OF SUMMARY REPORTS

Re SAC Letter #95 dated September 22, 1951.

This is to advise that Butte has already prepared summary reports on Security Index cases as follows:

Category 1	None
Category 2	None
Category 3	None
Category 4	3
Category 5	2
Category 6	None
Category 7	4

The above nine reports have either been submitted to the Bureau already or have already been dictated to a stenographer.

Butte has already prepared six summary reports in cases involving possible prosecution under the Smith Act. Five of these came under Category 4 and one under Category 7. Consequently, the total number of summary reports in each category are as follows:

Category 4	8
Category 5	2
Category 6	None
Category 7	5

The following number of reports falling in the various categories are due to be prepared by the Butte Office:

Categories 4 and 5	14
Category 6	None
Category 7	48

This letter is being forwarded to the Bureau now because Butte has no plans for submitting any more summary reports until after the first of the year.

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI
FROM : SAC, Detroit ()
SUBJECT: EMERGENCY DETCON PROGRAM
INTERNAL SECURITY - C

DATE: November 23, 1951

When a Security Index subject is placed in, or removed from, either the "Detcon" or "Consab" classification, it is the practice of the Detroit office to place a copy of the form FD-122 in either or both the "Detcon" or "Consab" file, as the situation demands. No Bureau instructions requiring this were located. However, this procedure was instituted in the period when Security Index cards were prepared by the field Division, as well as by the Bureau, so that an accurate record could be maintained to insure that the Security Index cards prepared by this office would correspond exactly with those prepared by the Bureau and subjects in this Division. Also, this procedure was adopted to provide some source for an accurate count of the subjects in Detcon and Consab classifications.

With the adoption of the IBM card and the practice of preparing all Security Index cards at the Bureau, it is no longer possible for the Security Index cards in the field to be other than identical with the Security Index cards, as maintained at the Bureau. Also, since the Detcon and Consab classification now appears on the face of the SI card, it is possible to determine the exact number of persons in either classification by physical count of the cards.

It is therefore felt the reason for placing a copy of the FD-122 in either the Consab or Detcon file no longer exists and, if you have no objection, the practice will be discontinued by this office.

~~GENERAL~~

With reference to the request of the Department to retain a second copy of the Security Index list to be divided among the attorneys working on this matter, I talked to Deputy Attorney General on the night of December 18 and told him that we were arranging to have this extra copy given to the attorneys in the Criminal Division; that, however, it was imperative that the Bureau know who was working on this project in view of the extremely confidential nature of the list; that it would be disastrous if a leak should occur with reference to this list.

Mr. stated that it was for this reason that he had forwarded a memorandum to the Bureau on December 7 listing all of the personnel in the Criminal Division and that if any derogatory information was developed as a result of the check of the names which is being conducted of these individuals, he would be sure that they were not assigned to review any of these lists.

TO: ALL SUPERVISORS ON SECURITY INDEX DESK December 13, 1951

FROM:

SUBJECT: REVIEW OF LOYALTY CASES FOR
SECURITY INDEX

Attached herewith is a list of names of individuals who were investigated under the Loyalty Program. The main loyalty file and subversive file numbers are shown where known. Each of these individuals was either dismissed from, or denied Federal employment. Their current activities and present employment are not known.

You are to call for all main files on each of these subjects and review them to determine whether the office of origin has received all pertinent loyalty reports and copies of any other reports where main security files are existent. In any instances where pertinent information has not been made available to the office of origin, such information should be furnished as enclosures to a memorandum to the office of origin.

If the main files do not reflect the results of hearings conducted before the Loyalty Review Board in each case, the Washington Field Office should be requested to obtain a photostatic copy of the hearing and transmit it to the office of origin.

The office of origin should be requested to review all information in its possession and to conduct active investigation to determine the subjects' current activities and employment. In each instance where a current report is not reflected in the files, a current report should be submitted by the office of origin. Each case should be handled as any other current security investigation and the field should be instructed to determine whether the subject should be in the Security Index at this time. If not, the Field should be instructed to consider the subject for interview and submit its recommendation for same to the Bureau for approval.

9
GENERAL
Security Index

957

You may find that in many of these cases, current investigation is being conducted or the above requirements have recently been complied with or some other action has been taken which would obviate the necessity for complying with the above instructions. If so, no further action need be taken by you.

The object of this review is to be fully certain that the Security Index Unit has taken all action necessary to assure that each of these cases has been fully developed as of this time and that all of these subjects have either been placed in the Security Index where warranted or consideration has been given to interviewing them for information in their possession.

Communications concerning this matter should bear the character Security Matter.

You are to complete this project by January 7, 1952. Your copy of this memorandum and the attached list should be returned with a notation adjacent to each name on the list as to the action you have taken in each case.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FVB FROM : SAC, Albany
AZH

DATE: December 12, 1951

SUBJECT: SECURITY INDEX -- Preparation of Summary Reports

Re SAC Letter #95 (B), captioned as above, dated 9/22/51.

A review of Albany files in connection with the preparation of summary reports under referenced SAC Letter, has disclosed a number of reports written prior to the adoption of present standards for security reporting, which contain information without indicating the source.

I realize that any such information falling into the category of Sections 2, 3, 4 and 5 of the form indicated for preparation of summary reports, as set out on pages 6 and 7 of the referenced SAC Letter, must be attributable to a definite source in order to be included in a summary report. It appears, however, that a different view might be taken with respect to such information falling in category (1) -- Background, set out on page 6 of referenced letter, particularly items (c) Education; (c) Employment; and (d) Residences.

If a file review reflects that the source of information in these subdivisions of Category (1) is not available, two methods occur to me to handle this problem:

1. Submission of the summary report could be delayed until a source can be found for each item of pertinent information.
2. A summary report could be submitted at the present time, based on the information in the file, with leads being set out to obtain sources for any information not presently attributable to a specific source.

A concrete example of the problem posed was called to my attention by an Agent, who, in reviewing a file, found a report which made the categorical statement that the subject had previously resided at three addresses, which were listed. No source for this statement appears in the file. If the first alternative were followed, submission of the report in that particular case would be delayed while the Agent made an intensive investigation to verify, through some source, the fact that the subject did reside at these addresses. Use of the second suggested alternative would permit a more prompt submission of the summary report, and necessary investigation to verify these addresses could be conducted in conjunction with other investigation later in the case.

Bureau advice in this matter is requested. It would be helpful if this matter could receive as prompt a reply as possible, since a number of security reports are dependent on the Bureau's answer.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: 12-13-51

FROM : SAC, Cincinnati

SUBJECT: CINCINNATI - VITAL PROTECTIVE

Re: let to Boston, 12-5-51.

Please be advised that reports of Security Index Subjects employed in Vital Facilities have been submitted and distribution made to interested field offices for their information and action.

Reports regarding the above three subjects are currently being prepared and will be submitted within two weeks.

(H) SECURITY INDEX - PREPARATION OF SUMMARY REPORTS -- Reference is made to SAC Letter Number 95 (B) dated September 22, 1951. In response to several suggestions and observations concerning the matter of preparation of summary reports on Security Index subjects, the following instructions shall be adhered to in all Security Index cases where summary reports are being submitted.

INTERVIEWS OF SECURITY INDEX SUBJECTS WHEN WARRANTED

The following instructions should not be considered as changing in any way the standards for interviewing subjects of security investigations.

After the files have been reviewed concerning a Security Index subject for the purpose of preparing a summary report and all active investigation has been completed and it appears that the subject should be interviewed in accordance with current policy in our interview program, it will not be necessary to prepare a summary report until after the interview has been conducted.

In all instances, however, a current investigative report should be submitted with the necessary letter requesting authority to interview each subject. The investigative report should reflect all pertinent information not previously submitted in report form. Upon Bureau approval for interview the interview should be conducted in the prescribed manner.

If, after the interview, it is your recommendation that the subject not be retained in the Security Index, your letter to the Bureau advising of the results of the interview should contain your recommendation that the subject be removed from the Security Index. It will not be necessary to submit a summary report if the Security Index card is cancelled.

If, after the interview, it is your recommendation that the subject be continued in the Security Index, the summary report should be prepared immediately including the pertinent information concerning the subject developed in the interview. The administrative portion of the report should contain a statement advising that the subject is being continued in the Security Index.

In all instances where an interview is had with a subject of a security investigation who is of interest to other intelligence agencies, the results of the interview should be included in report form for dissemination to other interested agencies.

12/20/51
SAC LETTER No. 121
Series 1951

FORM AND CONTENTSynopsis

A synopsis shall be prepared for each summary report on a pink summary report first page. The synopsis shall contain clear and concise statements summarizing the subversive activities of the subject of the report as set forth in the details. The synopsis should not include background information inasmuch as this will be clearly set forth in the first portion of the details under the outline recommended in SAC Letter Number 95. The reports are not to be designated as "Prosecutive" or as "Investigative" summary reports.

Status

The status of each case will be reflected in the summary report at the end of the synopsis and at the end of the details as in regular investigative reports.

Details

In those instances where it is felt that further investigation is warranted, leads shall be set forth in the summary report as they would otherwise be handled until the required investigation is completed. It is not desired that the submission of these summary reports be delayed for the sole purpose of conducting current investigation in previously closed cases. Where further investigation is warranted as reflected from a review of the case, it should be covered through the use of leads as instructed above.

In most instances summary reports which have been prepared in the past in these cases are suitable for dissemination. There may be certain cases in which previous summary reports are not suitable for dissemination because of disclosure of sources. In such cases where dissemination of previous summary reports is not advisable, the information contained therein should be incorporated in the current summary reports in such a manner that the sources are fully protected and the information can be disseminated. It will be the responsibility of each office to be certain that all pertinent information concerning a Security Index subject has been incorporated in either a past or current

12/20/51
SAC LETTER No. 121
Series 1951

disseminative summary report as distinguished from investigative reports. It is intended that with the submission of the current summary reports on Security Index subjects each case will be in a current condition and that it will not be necessary to go beyond previous or current summary reports for pertinent information concerning each Security Index subject.

Sources whose identities would ordinarily be set forth in the details of an investigative report should be fully identified in the details of these summary reports. Sources whose identities would not ordinarily be set forth in the details of an investigative report should be identified by temporary symbols in the details and fully identified in the administrative pages. Only one temporary symbol should be utilized for each informant in each report. If one informant has furnished information which should logically be broken down under two or more of the headings in the report, this should be done with the same temporary symbol being used for that informant throughout the report.

DOCUMENTATION OF EVIDENCE

In those instances where documentary evidence is reflected by previous investigation and the names of those individuals who could produce such evidence are already known, the names of such individuals should be reflected either in the details by name, or, if their identities should be kept confidential, by temporary symbol with full identification in the administrative pages. A statement as to the location of the original exhibit should also appear in the administrative pages. For example, if the information was obtained from a written report of an informant furnished directly to an Agent, the identifying information appearing in the administrative portion of the report might read: .

T-1 S-1012 who furnished a written report to
Special Agent John J. Doe on July 16, 1950.
Informant's report is contained in New York
file

If the information was submitted by an informant to an office via mail, that informant should be identified and the name of the Bureau Agent initialing the mail into the file as well as the

12/20/51
SAC LETTER No. 121
Series 1951

location of the exhibit in the office files should be set forth.

If the identity of the source of the information being reported, the identity of the Agent receiving the information and/or the date the information was received, are not available in the subject's main file for inclusion in the report such information should be obtained by file review or, if the information is reflected as being available in the files of another office, a request should be made for full identification of the evidence. It will not be necessary to engage in an extensive project of preparing documentary evidence through photostating of exhibits already in possession of the office of origin for inclusion in the main file of each subject.

It is not desired that extensive investigation be conducted further to identify and locate outside individuals who have furnished background information nor is it desired that extensive investigation be conducted to obtain documentary evidence of background information. For example, if previous investigation has reflected that a subject, according to reliable records such as birth records, school records, or records of the Immigration and Naturalization Service, was born at a certain place on a certain date, such information will be sufficient for inclusion in the report. It will not be necessary to request investigation to obtain documentary proof of such data in these cases at this time. The place where such information was verified should, of course, be set forth in the report. If satisfactory verification of pertinent background data has not been made previously, such verification should, of course, be made at this time.

DISSEMINATION

The Summary reports prepared under the instructions in SAC Letter Number 95 and in this SAC Letter must receive the same dissemination on a local level that regular investigative reports would receive in these cases. The summary reports must be prepared in a manner suitable for dissemination to outside agencies and such dissemination must be made in all instances where warranted.

It is not desired that these summary reports be furnished to United States Attorneys at this time or at any time in the future until specific instructions are received from the Bureau.

SAC LETTER NO. 121
Series 1951

4

- -

PERIODIC SUMMARY REPORTS ON SECURITY INDEX SUBJECTS

Key Figures, Prominent Individuals and Subjects
Employed in Vital Facilities

Current instructions require submission of investigative reports on these subjects each six months. After submission of the initial summary report in these cases as required by SAC Letter Number 95, the report submitted six months from that date shall be a regular investigative report. The report submitted one year from the date of the last summary report shall be a summary report. It will not be necessary to submit an investigative report at the time the yearly summary reports are submitted. Each summary report will include pertinent information not previously included in summary reports.

Top Functionaries

Current instructions require submission of investigative reports each three months on Top Functionaries. After submission of the current summary report as requested in SAC Letter Number 95, the quarterly investigative reports shall continue to be submitted as in the past. The report submitted one year from the date of the previous summary report will be a summary report and will include information not included in previous summary reports.

All Security Index Cases

In any of the Security Index cases when the yearly summary report becomes due and it is found that insufficient information has been developed to warrant the preparation of a summary report, a regular investigative report should be submitted. The reason for not submitting the required summary report should be stated in the administrative portion of the investigative report.

It is not desired that the yearly summary reports be coordinated with the previous summary reports in so far as the "T" symbols of the sources are concerned. If a certain temporary symbol number was used for a source in a previous summary report, the symbol number will not necessarily be the same for that source in the subsequent summary report. In other words, the temporary symbol numbers for each summary report on one subject will be listed in numerical order for that report independent of the other reports.

FROM :

SUBJECT: SECURITY INDEX - *GENERAL*
PREPARATION OF SUMMARY REPORTSSECURITY INVESTIGATIONS OF INDIVIDUALS -
INVESTIGATIVE REPORTSPURPOSE(1) Summary Reports

To obtain approval for the attached proposed SAC Letter containing instructions concerning the preparation of summary reports in Security Index cases.

(2) Investigative Reports

To obtain your approval for the attached proposed SAC Letter instructing the Field to follow the prescribed form for summary reports in the preparation of investigative reports in security investigations of individuals.

BACKGROUND

- (1) SAC Letter Number 95 dated September 22, 1951, instructed the Field to prepare summary reports in all cases included in the Security Index.

Attached are seven letters from the Field containing questions and suggestions concerning the preparation of summary reports. All of these communications have been acknowledged. The Bureau's instructions with regard to certain phases of the summary report project are contained in the attached SAC Letter. This letter covers the questions and suggestions of the Field as well as additional instructions originating in the Internal Security Unit.

- (2) In the interest of standardizing the form of our reports on security investigations of individuals, it is felt that it would be well to use the form prescribed in
- /

SAC Letter Number 95 in investigative reports as well as summary reports. It is felt that by utilization of this form by all offices in all reports in security-type investigations, the cases can be more efficiently handled and the preparation of future summary reports will be greatly facilitated.

ACTION

The two proposed SAC Letters are attached for approval.

FROM : SAC, PHOENIX

CONFIDENTIAL

SUBJECT: PHOENIX REPORTS IN
SECURITY INDEX CASES

Reference Phoenix letter dated October 23, 1951.

At the present time, the Phoenix Office has one hundred three Security Index subjects included on the Security Index list.

Since the submission of referenced letter, the Bureau has been requested in connection (17) cases to submit the information of Security Index subjects. Eleven (11) individuals have been authorized and seven (7) subjects have been interviewed, while five (5) Security Index subjects have been removed from the Phoenix list.

Since the submission of referenced letter, the Bureau has been requested in five instances to remove the subjects from the Security Index list and there are still three individuals pending. It is anticipated additional removals will be made as the Bureau is authorized the interview of other Security Index subjects.

With respect to the submission of summary reports, the Phoenix Office has submitted seven such reports since the date of referenced letter. The remaining schedule of summary reports to be submitted is set out below:

<u>Summary Report</u>	<u>Number of Days</u>
2	0
3	0
4	0
5	0
6	0
7	0

The continuation of an individual's Security Index status will be maintained and the submission of summary reports will continue.

SUBJECT: Summary Reports in Security Index Cases
Kansas City Division

Remylet 10/22/51.

Please be advised that there are a total of 38 summary reports which are to be submitted by this office. Of this total, 9 summary reports have been prepared within the instructions contained in SAC Letter #95, dated 9/22/51.

Referenced letter stated that this program would probably be completed in this office by 1/15/52.

The transfer of approximately one-half of the Special Agents working on security matters in this Division and the occurrence of special investigations in this office which have consumed the time of other Agents working on security matters requires a revision of the completion date of this program to April 15, 1952.

Office Memorandum • UNITED STATES GOVERNMENT

TO : DIRECTOR, FBI

FROM : SAC, WFO (

SUBJECT: SUMMARY REPORTS IN SECURITY INDEX CASES

DATE: December 29, 1951

Re SAC letter dated September 22, 1951, calling for the submission of data on January 1, 1952, regarding categories 2, 6 and 7 under the heading "Schedule for Submitting Reports."

Concerning category 2, the Bureau is advised this office now has 25 cases maintained in the special section of the Security Index box. Of this number, six cases are presently in a current status with respect to this category. The remaining cases have been assigned and the agent personnel have been instructed to prepare summary reports.

Regarding category 6, there were 19 Security Index cases on which no derogatory report had been submitted since January 1, 1949. Since the institution of the summary report project, two summary reports have been prepared, leaving a total of 17 cases left to be done at this time.

With respect to category 7, the remainder of Security Index cases not coming within previously set forth categories, this office now has 102 cases on which summary reports will have to be written. My letter of October 20, 1951, tabulated 173 cases in this category. This number has been reduced due to either deletion of the subject from the Security Index or transfer of the office of origin. No summary reports have been prepared concerning cases in this category. However, they have been placed in line for the writing of summary reports upon the completion of those cases having a higher priority under this program.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI
FROM : SAC, Los Angeles (HKS)
SUBJECT: SUMMARY REPORTS IN
SECURITY INDEX CASES
DATE: December 28, 1951

Re SAC Letter No. 95, 9/22/51, Section B, and mylet dated 10/18/51.

The following reflects the number of summary reports submitted during 1951 within the various categories outlined in SAC Letter No. 95:

Special Section	
Espionage	5
Government Employees	1
Prominent Persons	2
Vital Facility Employees	20
Key Figures (Including Smith Act Summaries)	21
Others	26

It should be noted that the current Smith Act Prosecutions in Los Angeles, together with investigation of the underground activities of the CP and the efforts being made to reduce the large volume of currently unassigned cases, have required a major expenditure of Agent time which might otherwise have been devoted to the preparation of summary reports.

9-23

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: December 28, 1951

FROM : SAC, Chicago

SUBJECT: SUMMARY REPORTS IN SECURITY
INDEX CASES

Re SAC Letter No. 95, Series 1951, dated 9-22-51, and Chicago letter dated 10-22-51.

Since the institution of the project of writing summary reports and the submission of statistical information by referenced Chicago letter, a total of 186 cases in Categories No. 6 and 7 have been assigned for the purpose of bringing the investigation up to date and the preparation of a summary report.

After review and investigation, a good number of these individuals have been the subject of letters requesting authority to interview, based on evidence of their defection, lack of activity, or for other reasons. Fifty-eight of those cases remaining have been dictated and will reach the Bureau in the near future.

There follows a breakdown of cases furnished in referenced Chicago letter, in addition to which there is included a tabulation of summary reports submitted and those projected:

1. Category No. 3 - 12 cases

Summary reports have been submitted in 4 cases, 2 additional cases are assigned for reporting, and summaries on the remaining 6 will be submitted at the time the next 6 months report is due.

2. Category No. 6 - 97 cases

Summary reports have been submitted in 3 of these cases and the remaining 94 are assigned for this purpose. As previously noted, Bureau authority to interview has been requested in a number of these cases and 58 others are presently in dictation.

Director, FBI
12-28-51

RE: SUMMARY REPORTS IN SECURITY
INDEX CASES

977
changed
to
9-23

3. Category No. 7 - 701 cases

89 of these cases have been assigned for the purpose of preparing summary reports and are under active investigation. This number is in addition to those previously opened and assigned for other reasons in which instances summaries will also be submitted.

In Category No. 4 summary reports have been submitted on 2 Key Figures and 6 others are in dictation. This number is over and above those on whom summaries were prepared in connection with Smith Act prosecutions.

The Chicago office is making every effort to expedite this program which is commensurate with our other responsibilities in the security field and it will be completed at the earliest date possible.

IN SECURITY INDEX CASES

Re: SAC Letter No. 95, dated September 22, 1951.

Eight summary reports in security index cases have been submitted to the Bureau.

Within the next three months twenty-five cases will be assigned for preparation of summary reports and will reach the Bureau during that period.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: January 3, 1952

FROM : SAC, Miami (SUBJECT: SUMMARY REPORTS IN
SECURITY INDEX CASES

Reference is made to SAC Letter No. 95, dated September 22, 1951, Paragraph B, concerning the preparation of Summary Reports in Security Index cases.

Further reference is made to Miami letter to the Bureau dated October 24, 1951, outlining the plans formulated by the Miami office in undertaking this program of preparation of Summary Reports.

It will be recalled that it was my intention of opening ten cases on November 1, 1951, and ten cases on December 1, 1951, for the purpose of preparing summary reports in accordance with the Bureau's instructions. Frankly, this program has suffered tremendously as a result of my having to utilize the experienced Agents who would normally be assigned to handling this program on other special matters in the office. We have had a deluge of Civil Rights investigations which, according to Bureau instructions, had to be given top priority. Special squads were set up to expeditiously investigate these matters, such squads having to be composed of the most experienced Agents in the office.

The Bureau has advised me that they are transferring an additional 20 Agents into the Miami Division to assist in these specials that are being handled as well as the other work, which will mean that I will be able to relieve some of the men who would be working on this security summary report program and every effort will be made at this time to bring the program in line with the plans formulated in my letter of October 24, 1951.

It is sincerely hoped that the Bureau will bear with the Miami Division during this shortage of personnel and the next progress memorandum, I feel sure, will show that substantial progress has been made.

Office Memorandum • UNITED STATES GOVERNMENT

SUBJECT: SUMMARY REPORTS IN SECURITY INDEX CASES
NEW ORLEANS DIVISION

Re SAC Letter 95B dated 9-22-51 and mylet 10-22-51.

Reports have also been scheduled to be submitted on the remaining four key figures at the time when the next regular scheduled report is to be prepared.

Concerning Category 6 covering Security Index Cases wherein no pertinent derogatory information has been submitted in report form since January, 1949, assignments have been made in nine of the 12 cases for the preparation of prosecutive summaries. To date four such summaries have been submitted and the other 8 are currently in the process of being prepared.

Of the 40 remaining cases in Category 7 assignments for the preparation of prosecutive summaries will be made as soon as all of the prosecutive summaries covering the Security Index Cases in Category 6 have been completed. Efforts will be made to complete this project of prosecutive summaries as expeditiously as possible in accordance with the present work load in the office and the personnel available for the tasks. *ja*

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FROM : SAC, Albuquerque (

SUBJECT: SUMMARY REPORTS IN
SECURITY INDEX CASES

DATE: December 29, 1951

Re SAC Letter #95 dated September 22, 1951, Paragraph B, requesting that the Bureau be advised within thirty days and again on January 1, 1952, of the plans made for the preparation of summary reports in Security Index cases and the progress made in the preparation of same.

By letter dated October 3, 1951, the Bureau was advised of the number of summary reports to be prepared in the various categories of cases. At this time the Bureau is again being advised of the status of the program for preparation of summary reports in these cases.

The following breakdown will reflect the status:

<u>CATEGORIES</u>	<u>NUMBER</u>	<u>SUMMARY REPORTS PREPARED</u>
Special Section	0	0
Top Functionaries	0	0
Key Figures	6	1
Vital Facilities		
Subjects	8	0
No. 6	1	0
No. 7	39	12

In Category No. 7, two additional Security Index subjects have been added by virtue of their transfer from other districts to the Albuquerque Division. In this same category, three Security Index subjects who formerly resided in the Albuquerque Division have been transferred to other Field Divisions. One additional Security Index subject died since the last Albuquerque letter. The total remaining summary reports to be prepared in these cases, therefore, is thirty-nine (39).

The preparation of these summary reports is slightly behind schedule planned in this Division due to the fact that a large number of the Agents in this Division were on special assignment in connection with the Comfuz, Internal Security - C case for a lengthy period. The status of this program will again be the subject of a letter to the Bureau on or before April 1, 1952.

0

(I) SECURITY INVESTIGATIONS OF INDIVIDUALS - INVESTIGATIVE REPORTS --
Reference is made to SAC Letter Number 95 (B) dated September 22, 1951, which contained an outline of the form to be used in the preparation of summary reports on Security Index subjects.

In order that uniformity will be established throughout the Field, the form set forth in SAC Letter Number 95 shall be used wherever possible in investigative as well as summary reports on security investigations of individuals. The headings prescribed in the recommended form should be used in each investigative report whenever information is being included in the report which would logically fall under such headings. Information appearing under each heading should be in chronological order. Of course, when no information appears in an investigative or summary report which could logically be placed under one or more of the headings, such headings should not appear in the reports.

The Bureau feels that by this standardization of the form for all security reports on individuals and adherence thereto by all offices wherever possible, review of such reports and preparation of future yearly summary reports will be greatly facilitated. Agents handling these cases will more readily be able to obtain the desired information from the case files of the subjects for appropriate action and will be able more readily to determine weak points in each investigation. Direction of each investigation to a logical conclusion will thus be greatly facilitated.

These instructions should not preclude the addition of other appropriate headings when, in individual cases, certain information can more logically be set forth under such headings.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FROM : SAC, New Haven (

SUBJECT: SUMMARY REPORTS IN
SECURITY INDEX CASES

DATE: January 2, 1952

Re SAC Letter 95(B) dated September 22, 1951 and
New Haven letter to Bureau dated October 24, 1951.

The following is a schedule showing the status of the Summary
Report Project:

<u>Category</u>	<u>Total Number Scheduled For Preparation of Summary Reports</u>	<u>Number On Which Summaries Have Been Prepared</u>
2	2	None
6	22	None
7	341	2

Although there have been only two Summary Reports submitted by New Haven which fall into the above categories, there have been a total of 16 other Summary Reports submitted in Security cases. Of these 8 were submitted in Category 1, one in Category 4 and 7 in Category five. Also, there are several Summary Reports in preparation which will reach the Bureau in the near future.

Every effort has been made by this office to prepare and transmit Summary Reports to the Bureau consistent with the manpower available for this project and the demands made upon the Agents assigned to Security investigations. Every effort is being made to keep this project currently active and to comply with the Bureau's instructions relating thereto.

It is felt that the instructions with respect to the preparation of Summary Reports, which have now been received in SAC Letter No. 121, dated December 20, 1951, will materially assist this office in completing this project; however, it is felt at the present time that a maximum of fifteen Summary Reports per month will be prepared for transmittal to the Bureau.

<u>Category</u>	<u>Reports Necessary</u>	<u>Reports Submitted</u>
2	None	None
6	14	2
7	69	14

In addition to the above, there have been 6 other summary reports submitted by this office, for a total of 22 summary reports.

994 changed to 31-16

Office Memorandum • UNITEC GOVERNMENT

Handwritten initials

TO : Director, FBI
FROM : SAC, Newark
SUBJECT: SUMMARY REPORTS IN SECURITY INDEX CASES

DATE: December 29, 1951

Re Section B, SAC letter number 95, series 1951, dated 9-22-51 and Newark letter to the Bureau dated 10-23-51.

Referenced SAC letter requests that a memorandum reporting the status of the summary report project in this office be submitted to the Bureau on 1-1-52.

There are maintained in the Newark Office 594 security index subjects, 19 of which have had summary reports prepared on them. (Does not include six prosecutive summaries prepared under the Smith Act). This is broken down as follows:

		Total cases under each category	Summaries Prepared
Category II	Special Section	None	
Category III	Top Functionaries	None	
Category IV	Key Figures	100	7
Category V	Employed in Vital Facility		
	Other Than Key Figures	58	2
Category VI	Subjects concerning whom no derogatory information has been submitted in a report form since 1-1-49	28	2
Category VII	All Others	407	7

Category I, SUBJECTS BEING CONSIDERED FOR INCLUSION IN THE SECURITY INDEX

Although not mentioned in the above breakdown, subjects being considered for inclusion in the security index are considered whenever the occasion arises. One summary report has been prepared under this category. Also not included in the above breakdown are three security index subjects presently in the Armed Forces.

It has not been possible to strictly adhere to the priority schedule set out in referenced SAC letter inasmuch as in some instances the Bureau has requested that a summary report be prepared on a particular subject and because it was occasionally deemed necessary and warranted to prepare summary reports in cases of extreme delinquency or where the office of origin is being changed.

changed
to
31-16

The Newark Office has been following a policy of preparing investigative reports on security index subjects when the case is extremely delinquent or when the Bureau has requested a report be submitted immediately. In these cases a summary report has been scheduled for preparation at a later date. Unless advised to the contrary, the Newark Office will continue this practice.

In an effort to expedite this project, experienced agents have been assigned exclusively to the writing of summary reports. All leads that must be covered before a summary report can be adequately prepared, and all leads set out in the summary reports, are being handled by other agents.

It is believed that through the experience gained by handling nothing but the preparation of summary reports, that the abovementioned Special Agents will gain momentum in the preparation of summary reports and the completion of the project will be more quickly accomplished.

Office Memorandum • UNITED GOVERNMENT

TO : Director, FBI

DATE: Dec. 29, 1951

FROM : SAC, Atlanta (

SUBJECT: SECURITY INDEX
PREPARATION OF SUMMARY REPORTS

Reference is made to SAC Letter #95 (B), Series 1951, and SAC Letter #121, Series 1951.

You were originally advised that summary reports would be completed on all Security Index subjects no later than February 15, 1952. At the present time an appropriate file review is being undertaken in this office in view of instructions contained in SAC Letter #121 with respect to possible interview prior to the submission of a summary report.

To date no summary reports have been submitted, and it is anticipated that on completion of the file review Bureau authority will be requested for an interview with the majority of the twelve Security Index subjects in the Atlanta Division.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI (

FROM : SAC, Louisville (

SUBJECT: SUMMARY REPORTS IN SECURITY INDEX CASES
(Status of Project - Louisville Division)

DATE: 12/29/51

Re Section (B), SAC Letter No. 95, Series 1951, 9/22/51, and my letter of Oct. 25, 1951.

It is apparent at this time that the estimated time of the completion of this project in this office must be extended. The previously estimated date of completion of the project in this office was January 1, 1952 or at the latest, January 31, 1952. It is now believed that this project cannot be completed in this office prior to July 1, 1952.

This estimate is made considering the time necessary for file reviews in this office and the additional reviews which will be requested of other offices to locate and identify original sources, dates of receipt of information, and agents receiving and characterization of individuals and organizations mentioned in reports prepared prior to the adoption of current reporting standards. Two factors not considered in making the previous estimate are: The time necessary in preparing for, obtaining authorization for and conducting interviews with subjects prior to determining whether or not they are to be continued on the security index and the time necessary to prepare characterizations, identify sources, etc., requested by other offices.

Factors contributing to the failure to complete the project in this office as originally planned are: Underestimation of the work and time necessary, pressure of other work, requiring temporary attention of personnel assigned to security work, the time necessary for agents not previously assigned to security investigations to familiarize themselves with specialized instructions and the individuals and organizations involved.

SAC Letter No. 121 will greatly facilitate the preparation of reports under this program and agents assigned to this project are now familiar with security work.

To date, one summary report has been prepared. The case in which it was prepared was in Classification 7, of the schedule set out in SAC Letter No. 95, inasmuch as it was in such condition as to require no immediate information from other offices. Preliminary reviews have been conducted on several other cases and requests made to other offices to furnish information as to original sources, characterizations, etc.

changed to
27-14

Following are the total number of cases in the indicated categories (of the schedule in SAC Letter No. 95) in which summaries are to be prepared.

2. (Special Section)	None.
6.	Three
7.	Eleven.

In addition to the above, there are nine cases in which Security Indexing is to be considered. Of those cases in which summaries are planned, several are to be considered after interview of the subject, for cancellation thus eliminating the need for summary reports.

FROM : SAC, Albany

SUBJECT: SUMMARY REPORTS IN SECURITY INDEX CASES

Re SAC Letter #95, Series 1951, Section B, and my let 10/23/51.

In Category 1, 14 summary reports have been prepared and submitted, and in each case an FD 122 has been submitted.

There is no change in either Category 2 or Category 3, since my letter of October 23, 1951.

Regarding Category 4, summary reports on two key figures have been prepared and submitted, and in addition, I have given specific instructions that the Agents to whom cases in which such reports are overdue are assigned, submit summary reports by specific dates; I will follow this program personally.

In connection with Category 5, two summary reports have been prepared and forwarded. In this regard, as soon as substantial progress has been made in the submission of summary reports in Category 4, I will follow the same plan in this category.

No summary reports have as yet been prepared and submitted in Categories 6 or 7, and as stated in my letter of October 23, 1951, the scheduling of such reports will necessarily be deferred until the higher priority categories have been substantially completed.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FROM : *JW* SAC, Detroit ()

SUBJECT: SECURITY INDEX IN PREPARATION
OF SUMMARY REPORTS

DATE: January 3, 1952

Reference is made to SAC Letter Number 95, Series 1951, dated September 22, 1951, and Detroit letter to the Director, October 24, 1951.

In accordance with instructions contained in referenced SAC Letter, summary reports have been prepared in the classes of cases designated by that letter. The reports prepared under each class are set out in numbered paragraphs to correspond to the numbered paragraphs set out under the caption, "Schedule for Submitting Summary Reports" in reference SAC Letter.

- 1) Summary reports have been prepared on six subjects in recommending them for inclusion in the Security Index.
- 2) A summary report has been prepared on one subject in this group. There are now only six individuals in the Special Section of the Security Index and the remaining five cases are assigned and summary reports are being prepared.
- 3) A summary report has previously been prepared for each subject who is a top functionary in this District.
- 4) Summary reports have been prepared on ten subjects who are Key Figures in this Division. All Key Figures are, of course, in a pending, assigned status and summary reports are being prepared as the semi-annual report falls due.
- 5) Summary reports have been prepared on eight subjects who are employed in vital facilities. Files of all Security Index subjects employed in vital facilities are being reviewed and, of the 34 cases in this classification, 125 have been assigned for the preparation of a summary report.
- 6) Approximately 250, or 1/2 of the cases on subjects in Security Index, have been reviewed and, of this number, only six were found in which no pertinent derogatory information is available for inclusion in report form since January 1, 1951. These six cases, however, are being opened and assigned for the preparation of a summary report.
- 7) Summary reports have been prepared on 10 subjects who are in the Security Index and are in a pending, assigned status. Summary reports are being prepared as the semi-annual report falls due.

Letter to the Director
January 3, 1952

SECURITY INDEX IN PREPARATION OF SUMMARY
REPORTS

various reasons. Whenever a report on one of these cases is required for any reason, a summary report is prepared. Summary reports have been written on four subjects in this group.

Continuous attention will be given to the preparation of summary reports in the required cases. Particular emphasis will be placed on the completion of the reports on those subjects in the Special Section of the Security Index.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: 1/2/52

FROM : SAC, New York

SUBJECT: SUMMARY REPORTS IN SECURITY INDEX CASES

Re SAC Letters #95 and #121, dated 9/22/51 and 12/20/51 respectively, and remylet 10/22/51.

With regard to the 111 cases in the Special Section category, our files reflect that in 73 of these cases summary reports within the requirements of SAC Letter #95 have been submitted. The remainder of these cases are being followed closely in order to insure the early submission of summaries.

A survey of the files of this office reflects a total of 2,871 cases in categories 6 and 7. An analysis for the purpose of breaking down the total into the appropriate categories reflects that 204 cases fall into category 6. Of these 204 cases, 32 are in a pending status. Steps are being taken to see that all these 204 cases are reopened and assigned as soon as possible in order to comply with the instructions in referenced SAC letters.

Category 7, the survey shows, consists of 2,667 cases in which reports containing derogatory information have been submitted since January 1, 1949. Instructions are being issued in order that the next reports in pending cases in this category will be submitted as summary reports. It is contemplated that the remainder of the cases in this category, which are not pending at present, will be given attention under this program when the handling of the cases falling in the higher categories on the schedule has been substantially completed.

In spite of the heavy load of almost 7,000 Security cases, the subjects of most of which are being considered as possible additions to the Security Index, this office fully appreciates the importance attached to this program of preparing summary reports on those persons already listed in the Security Index. The personnel handling Security cases are being frequently reminded of the urgency of the program outlined in the referenced SAC Letters, and the entire matter will continue to receive close attention.

TO : Director, FBI

DATE: December 28, 1951

047 FROM : SAC, El PasoSUBJECT: SECURITY INDEX -
PREPARATION OF SUMMARY REPORTS

Rebulet November 26, 1951.

This is to advise of the status of preparing summary reports on security index subjects of the El Paso Office. There are 15 security index subjects of the El Paso Office. As of this date three summary reports have been written, two additional reports are in dictation, and three additional cases have been definitely assigned for reports to be written promptly.

In the immediate future, the remaining seven security index cases will be assigned for immediate preparation of summary reports.

It should be noted that up until this date most of the investigative efforts from the Agents of the El Paso Office have been necessarily directed toward an investigation involving an escape route for Communist Party fugitives and the resulting harboring cases.

INTERVIEWS OF INTERNAL SECURITY - C
AND SECURITY MATTER - C SUBJECTS

SECURITY INDEX

Reurlet dated December 20, 1951, in which you stated that it is assumed in connection with Bureau-authorized interviews of the above type that it is necessary for the interviewing Agent to warn the interviewee of his right to counsel, etc., and any statements furnished by such an individual would necessarily contain such warning in the first paragraph thereof. You request advice as to whether this procedure should be followed in all instances.

All interviews conducted by Special Agents of the Bureau must be handled in such a manner that there will be no basis for an allegation that the constitutional rights of the individual interviewed were violated.

Interviews of this type must be planned in accordance with the information available concerning the persons to be interviewed and the interviewing Agents must be thoroughly familiar with the background information regarding persons interviewed. It is not mandatory that signed statements be obtained; however, when possible and the facts warrant, a signed statement should be taken.

In those instances when the subject makes admissions as to his participation in Communist Party activities or activities in violation of the Federal code and it is obvious to the Agents conducting the interview that prosecution may be expected at a later date, the Agents should be certain that Bureau instructions in this regard, as they apply to interviews and the taking of signed statements, are closely followed.

I am sure you realize the importance of the interview program as a means of developing informants and information of intelligence value which are the primary purposes. Generally, the purpose of an interview of this type is not to build the case for prosecution. Tact must be used in handling interviews if we are to obtain the best results possible.

SUBJECT: SECURITY INDEX.
NEW ORLEANS DIVISION.

STRICTLY CONFIDENTIAL

Re SAC Letter 100, dated 12-28-50.

The residence and employment addresses of all Security Index subjects in the New Orleans Division were confirmed during the months of August and September 1951. In addition, all Security Index subjects at that time were personally observed by an agent of this office to whom the individual case file is assigned, for apprehension under the DETCOM project.

SUBJECT: SECURITY INDEX - PREPARATION OF
SUMMARY REPORTS
SECURITY MATTER - C

Reference is made to Section H of SAC Letter 121 dated December 20, 1951, concerning the preparation of security index summary reports and in particular to the instructions therein pertaining to the documentation of evidence. It is noted that if the required information is available only in the files of another office, a request should be made of that office for a full identification of the evidence.

It is recognized that such offices as New York City, Los Angeles, San Francisco and Seattle which frequently disseminate information utilized by other field divisions are currently burdened with a tremendous amount of work, particularly in the security field. Requests under the above instructions in all probability will throw an additional load of a detailed file review nature upon such offices. Subsequently it is anticipated that a considerable time lag will result following the receipt of such requests in those offices and the time these requests can possibly be answered. It is believed that this unavoidable lag will cause a considerable delay in the preparation of many reports in that it will necessitate maintaining summary notes for a considerable period before dictation can be accomplished; may cause in some instances duplicate file reviews because of re-assignment of work and in general will result in a slow-down of the summary report program.

For these reasons, if so approved by the Bureau, the Portland Office will submit future summary reports utilizing information immediately available in its files for evidence identification purposes on the administrative page. Should it be necessary to obtain additional information from another office, a lead will be set out in the summary report for that office to supply the needed data. Upon receipt of this information, the Portland Office will submit amended administrative pages, thereby making the report current and complete in accordance with Bureau instructions.

RECORDED.

48 - SUMMARY 1 1951 -
PREPARATION OF SUMMARY REPORTS

Rebulet January 4, 1952, wherein you advised that in those instances where it is necessary to obtain additional information from other offices to fully document evidence contained in your summary reports, you will obtain such data through inclusion of leads in the summary reports rather than delay the submission of the reports until the necessary information is obtained from the other offices.

Your attention is directed to paragraph of the letter Number 121 (M) dated December 28, 1951, wherein it is stated that it is not desired that the submission of summary reports be delayed for the sole purpose of conducting current investigation in previously closed cases. It is pointed out that leads shall be set forth in the summary reports as they would otherwise be handled.

Your proposed method of obtaining the necessary data concerning the sources of evidence which data is available only in another office by the use of leads in the summary reports is in line with the instructions contained in the referenced letter and you may proceed to handle such matters in this manner.

FROM : SAC, CHICAGO ()

CONFIDENT

SUBJECT: SECURITY INDEX

Re Section (C) SAC Letter No. 100, Series 1950, dated December 28, 1950, entitled "Security Index."

The Chicago Office at the present time has 1042 Security Index subjects, and the residence and employment addresses of all have been verified within the past six months. This statement excludes those individuals whose whereabouts are presently unknown, in which instances active investigation is being conducted to locate them.

An administrative tickler is in operation to insure verification on each Security Index subject on a six months basis, and five and one-half months after the last such verification, FD-154 is routed to the Agent who has identified the subject for apprehension purposes, or if the case is open, to the Agent to whom the case is assigned. In the case of those subjects found to be unemployed the tickler is set so that the employment is verified each two months until such time as the subject obtains employment.

If the six months verification results in the employment and/or the residence of the subject being unknown, the case is reopened for necessary investigation to determine this information with the least possible delay.

FROM:

SUBJECT: REVIEW OF LOYALTY CASES FOR
SECURITY INDEX - GENERAL

Attached herewith is a list of names of individuals who were investigated under the Loyalty Program. The main loyalty file and subversive file numbers are shown where known.

The files will reflect that the majority of these subjects were still employed by the Government as of the date of the most recent information. A few will reflect the subjects to be no longer employed by the Government.

The loyalty investigation in each instance developed documentary evidence or an admission on the part of the individual of past membership or affiliation in the Communist Party or other revolutionary groups.

You are to call for all main files on each of these subjects and review them to determine whether the office of origin has received all pertinent loyalty reports and copies of any other reports where main security files are existent. In any instances where pertinent information has not been made available to the office of origin, such information should be furnished as enclosures to a memorandum to the office of origin.

If the main files do not reflect that a copy of hearings conducted before the Loyalty Review Board in each case is in the possession of the office of origin, the Washington Field Office should be requested to obtain a photostatic copy of the hearing and transmit it to the office of origin.

/

1027

The office of origin should be requested to then:
(1) check its files for any derogatory information received subsequent to the Loyalty investigation; (2) review all information in its possession; (3) determine whether the subject should be included in the Security Index or whether he should be interviewed for information in his possession concerning subversive activities, and (4) advise the Bureau of its recommendation.

You may find that in many of these cases, current investigation is being conducted or the above requirements have recently been complied with or some other action has been taken which would obviate the necessity for complying with the above instructions. If so, no further action need be taken by you.

The object of this review is to be fully certain that the Security Index Unit has taken all action necessary to assure that each of these cases has been fully developed as of this time and that all of these subjects have either been placed in the Security Index where warranted or consideration has been given to interviewing them for information in their possession.

Communications concerning this matter should bear the character Security Matter.

You are to complete this project by January 15, 1952. Your copy of this memorandum and the attached list should be returned with a notation adjacent to each name on the list as to the action you have taken in each case.
